### PVC Roll Floor

#### Product Features:

1. high strength wear-resistant UV coating, super wear-resistant scratch.
2. The special surface treatment, excellent stain resistance
3. The five new product structure to ensure better dimensional stability.
4. Super cost-effective, affordable first choice.
5. The moisture-proof performance is good, the foot feeling more comfortable.
6. Excellent sound absorbing performance, create a quiet environment.
7. Excellent stain antibacterial properties, free waxing.
8. The technology originated in Europe, to ensure that non-toxic and environmentally friendly
9. color styles, better match

#### Wear layer

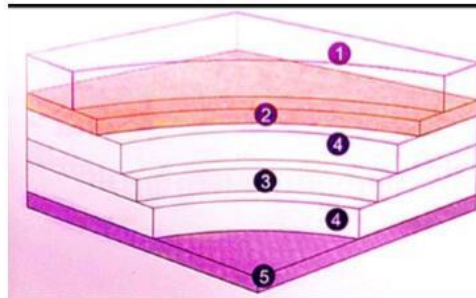

High-performance wear layer rolling type of production process, different from the ordinary type coating process, wear-resistant surface layer is more dense in the use of surface contamination resistance, superior compression performance, more durable life.

#### Fiberglass layer

Product mix by adding high toughness glass fiber layer, increase product toughness, stable performance, make the product more durable.

#### Dense bottom

Some brands in order to reduce costs, and 2.0mm on the following products are using foam at the end, resulting in products in actual use, can not afford the heavy roller drag other issues. Arcadia dragon using a molding process to produce formula rolling back layer, to prevent recycled materials to ensure product density of the backing layer, more compression when used for dynamic load carrying capacity stronger.

- ① Wear layer 耐磨层
- ② Print layer 印刷层
- ③ G/F wetted layer 玻璃纤维层
- ④ PVC sol layer 固化PVC层
- ⑤ Compact backing layer 密实底层

### PVC Roll Floor Size

*Pvc floor membrane using polymer materials through the special formulation process, high temperature plastics obtained by the product can suppress a variety of patterns, also can print a variety of patterns, there are eight categories of products, there are sports floor sheets commercial sheet flooring, sheet flooring car use, non-slip sheet flooring, homogeneous sheet flooring, sheet flooring used in hospitals, kindergartens use sheet flooring, sheet flooring for home use.*

#### Sports floor

Thick 3.5-80MM  
Length 20M  
Width 1.42M-1.8M

#### Commercial sheet flooring

Thick 2.0MM-3.5MM  
Length 20-25M  
Width 2.0M

#### Slip sheet flooring

Thick 2.0-3.5MM  
Length 15M-25M  
Width 1.2M-2.0M

#### Hospital sheet flooring

Thick 2.0-3.5MM  
Length 20-25M  
Wide 2M

#### Kindergarten sheet flooring

Thickness 2.0-3.5MM  
Length 20-25M  
Width 2.0M

#### Domestic floor sheets

Thickness 2.0-3.5MM  
Length 20M  
Wide 2.0M
